

How to have fun when there's no Sun!

Welcome to our Virtual Rain Trail. Even if the sun doesn't want to play, it won't stop us!

By clicking on the QR code or link below you will open up a trail that you and your child can follow no matter how wet things are outside. There is nothing to download and you simply follow the trail choosing the options you want.

After the opening page you can choose to explore one of three rainy options: Puddles, Rain or Rainbows. Each section begins with a fun fact, then you and your child can choose either an indoor challenge or an outdoor challenge.

These challenges are simple activities grown ups and children can do together. They use items commonly found around the house and help children to explore and use different skills.

If you don't get all the way through the trail don't worry. Simply save this link and come back to the trail any time you want! <https://bit.ly/3MFJKIJ>
